

IN GREAT SHAPE

Southern Cross Vans is celebrating the company's 10th anniversary for producing fully customised rigid bodies and trailers, all of which offer many unique in-built qualities and features designed to return affordable operation with highly prized resale values.

With a hands-on approach by the people who own the business, satisfaction is guaranteed throughout every stage of the engineering and manufacturing process, with on-going after the sale support, throughout Australia.

And now with a new purpose-built production facility on-line, owning a Southern Cross Van only gets better.
